

The logo for iClad.com.au is displayed in white text on a dark, textured rectangular background. The text 'iClad' is in a large, bold, sans-serif font, with the 'i' being lowercase and the 'C' being uppercase. The '.com.au' is in a smaller, lowercase, sans-serif font to the right of 'Clad'.

iMpa+ Multi-Purpose Adhesive Polymer-Based Acrylic Base Coat Render – is to be applied as a two coat 4mm-5mm thick base coat. iMPa+ Render is to be applied using a hawk and trowel and finished with a plastic diamond float. The second leveling coat of iMpa+ or iRender can be applied approx. 4-6 hours after first coat, depending on weather conditions, type of substrate and surface moisture content. Allow surface moisture to stabilise prior to screeding finishing coat. As a guide only, we recommend to trowel and float render instantly.

All Renders are to be left to cure a minimum 24 hours after drying before over coating with any of iClad Australia's Texture applied finishes.
